TREATMENT SUMMARY

PATIENT 52-year-old female

CHIEF CONCERN A desire to discontinue using the anterior repositioning splint that she had been wearing for over 5 years.

DIAGNOSIS Right: Class II
 Left: Class II

Patient is unable to function without her anterior repositioning splint. Frequent headaches and jaw soreness.

LENGTH OF TREATMENT 26 months

OF ALIGNERS USED Upper: 22 + 32
 Lower: 22 + 20

ADDITIONAL TREATMENT None. Vertical elastics were avoided, but the lower attachments were left on during the patient's retention phase to ensure that the extrusion achieved was maintained.

RETENTION Upper: Last aligner
 Lower: Last aligner
